

# TermoOnLine™

## the Wired Temperature Monitoring System

### A complete flexible Wired Temperature Monitoring System

#### Key Capabilities:

- Monitoring via remote wired sensors
- Recording the measured data on a PC
- On demand reports of data and Alarm logs
- Up to **256 sensors**
- Sensors connected via up to **500 meters** long **standard phone** 2 wires cable
- via **Email** and **SMS** alarms
- Inputs: NTC-10K $\Omega$ , 4-20mA, Thermocouple-K, Contact, Wet bulb / Dry bulb Psychrometer

#### Target Markets:

- Food industry
- Industrial processes
- Temperature controlled storage and maturing
- Laboratories
- Utilities remote sites – fuel, gas, electrical, etc.
- Data Centers
